(54) Title: CONTAINER STORAGE BOX FOR DEFORMABLE CONTAINER CONTAINING FINE PARTICLES FOR IMAGE
FORMATION

(57) Abstract: A container storage box of the present invention holds a flexible container that includes a flexible part and is capable of discharging its fluid contents for an image forming apparatus. The flexible container is taken out of the container storage box and is placed in a container loading part of the image forming apparatus. The container storage box has rigid sidewalls that prevent the flexible container from deforming during storage. The rigid sidewalls keep the flexible container in a configuration that is adapted to a container loading part of the image forming apparatus.
